Subject: Extension on ASME Certificate(s) QSC-400, QSC-400-1, & QSC-400-2; Exp Date 9/4/2025

Extension Date: [3/04/2026](#)

Onsite survey dates: TBD

Dear Mr. Leclercq:

An extension has been granted to the subject Certificate{s} to allow for the renewal process to be completed or for ASME Code Work-in-Progress to be completed. Until the renewal process has been completed, all certification activities recorded on Data Reports, Certificates of Conformances, or Certified Material Test Reports under the Extension Letter shall state in a remark that, "Work was completed under an ASME Extension Letter expiring on [3/04/2026](#)."

Data Reports registered with the National Board of Boiler and Pressure Vessel Inspectors will require a copy of the extension letter to be transmitted with the above remark in the Data Report.

If your quality program involves the use of an Authorized Inspector or Certified Individual, the Authorized Inspection Agency or Certified Individual has been placed on copy and requested to inform ASME when unable to perform duties under the ASME standard involving inspections, monitoring, verification, and witnessing, or when needing to express concern with the quality program requiring ASME involvement.

If you have any questions or concerns, please contact the undersigned.

Respectfully,

Andy Ruan, Secretary,
Committee on AIA Accreditation
