Version: June 29th, 2026

Dear Customers,

Per- and polyfluoroalkyl substances (PFAS) are a large class of thousands of synthetic chemicals that are used throughout society. However, they are increasingly detected as environmental pollutants, and some are linked to negative effects on human health.

We hereby certify that no PFAS substances are added to our steel during our casting and rolling processes in our ArcelorMittal Global Solutions Industeel plants of:

- Industeel Le Creusot
- Industeel Belgium
- Industeel Loire

ArcelorMittal Global Solutions Industeel
